Green Living in the Concrete Jungle: NYC Buildings Show the Way

By: Iana Sheremetieva

Impressions: 23,600

City dwellers often find it challenging to connect with nature, unlike their suburban counterparts. That's why, innovative urban developments now prioritize green living both within homes and throughout building amenities, allowing residents to embrace the natural world within their daily lives.

If you want to live your best "green" life in New York City, these iconic buildings have got you covered.

378 West End Avenue

Located on Manhattan's Upper West Side, [378 West End Avenue](#) is a new condominium designed by the renowned COOKFOX Architects. Boasting over 11,000 square feet of exquisite amenities, this development is a true masterpiece of modern architecture. Each of the fifty-eight residences has been designed with careful attention to detail, blending classic and contemporary elements to create an atmosphere of understated elegance. Developed by Alchemy Properties, these residences offer gracious proportions and rich materiality, ensuring that residents can enjoy the ultimate in luxury and green living.

One of the key features of 378 West End Avenue is the state-of-the-art technology that has been incorporated throughout the development. Building water and air filtration systems ensure that residents can enjoy a clean and healthy living environment, while
