Our leadership brings deep experience in sourcing, structuring, and executing complex real estate opportunities in partnership with some of the country's leading developers and institutional investors. APPROACH

From an investment perspective, we emphasize capital preservation first and foremost, instead of assuming unmanageable risks to chase outsized returns. We combine an institutional infrastructure with an entrepreneurial spirit to bring a fresh approach to well-located assets in high-barrier-to-entry markets. We engage in systematic and strategic repositioning initiatives to increase cash flow, effectuate capital improvement programs, and rebrand assets.

Preference is given to projects where our team's acumen in complex, challenging deals leads to greater success and value-creation. We rigorously pursue off-market opportunities and rely on the breadth and strength of our industry relationships, cycle-tested institutional knowledge, and the ability to assess and finance investments.

We seek to develop architecturally distinct condominiums and commercial properties that respect their location, neighborhood and site; buildings that will live in harmony with their surroundings and add character and value beyond the economic climate. We are actively pursuing opportunities in New York, Florida, North Carolina, Tampa/St. Petersburg, Kansas City, and various select submarkets in the Midwest in the range of \$50 to \$150 million.

Also of interest are core, core-plus, value-add ground-up opportunities in the above mentioned submarkets.

We also target existing office, retail, multifamily and mixed-use properties ranging from \$25 to \$400 million, which can be acquired at significant discounts to replacement cost or can be developed at attractive risk-adjusted yields on cost.
